Rental Property

The **Kansas Department of Health and Environment** can assist you with **“Free”** stabilization of surfaces containing lead-based paint in order to prevent lead poisoning in young children. A state-licensed risk assessor will determine the services needed to stabilize the lead-based paint in your rental property. Types of work may include specialized cleaning, wet scraping and repainting, replacement, encapsulation, or enclosure. State-licensed lead abatement contractors will perform all work.

Your property may qualify if:

- ✓ You own rental property in Wyandotte County that was built before 1978. Primary consideration will be given to the zip codes 66101, 66102, 66103, 66104, 66105, 66106, 66111, and 66112. The property must have no more than 4 apartments or housing units.
- ✓ All units are occupied or will be made available to families with a household income at or below 80% of the area’s median income. At least half of the units must be occupied by or made available to families with incomes at or below 50% of the area median.
- ✓ For at least 3 years following any lead hazard work on your rental property, you agree to give priority to families with a child under 6 years of age.

If you answered **“YES”** to all of the above, complete the following:

- ☐ **All** portions of the application form. **Sign and date** the application form.
- ☐ Verify income from all persons living in the building and provide documentation, if requested.
- ☐ Attach a copy of **Proof of Ownership**. (Deed or property tax statement)

For information about lead testing, call your doctor or the Health Department at 913-573-6780.
- ☐ **Mail or deliver** the application form and all required documents to the Project Lead-Safe Office (see address above) or to the Wyandotte County Health Department, Office of Environmental Services, 619 Ann Avenue, Room 321, Kansas City, KS 66101.
